Job Description: Climate Solutions Technologies Researcher

Integrated ClimateTech (iClimateTech) is seeking applications for a Climate Solutions Technologies Researcher. Given below are related details for this job position:

Minimum education requirements:

- Fluent in speaking and writing English
- Fluent in technical English
- Bachelor's or master's degree in an accredited engineering program.

The job activities include the following:

- 1) Research and evaluate complementary climate solution technologies including carbon capture, energy storage and renewable energy.
- 2) Help develop proposals for funding for combinations of climate solution technologies.
- 3) Help design and implement projects that include climate solution technologies.
- 4) Provide technical support for events that encourage investment in Climate Solutions.

This job will be partly funded by Electricity Human Resources Canada's (EHRC's) Empowering Futures Program. To be eligible, the candidate needs to meet the following requirements:

- Registered as a full-time or part-time student in a post secondary institution or they are a first-year apprentice in one of the construction or manufacturing Red Seal trades.
- Canadian citizen, permanent resident, or person with refugee protection in Canada.
- Legally able to work in Canada according to the laws and regulations of the province or territory where they live.

Work Location: Work from home with regular video conferences with "camera on" to communicate with the rest of the team. If the successful candidate lives in the Greater Toronto Area (GTA), this person would be invited to periodic meetings at the Clean Energy Zone in the Toronto Metropolitan University, which is located at 44 Gerard Street East, Toronto, ON.

In summary, this engineer would join [our team at the Integrated ClimateTech \(iClimateTech\)](#) to help us [integrate technologies to maximize climate impact and profit](#). In addition, this engineer would support our work with [the Climate Solutions Advancement Network \(ClimateSAN\)](#), which is a project of Think Renewables Group.

Interested candidates are invited to email a cover letter and resume to this email address: careers1@thinkrenewables.com. Since we receive many resumes, not everyone who sends us a resume will receive a reply.
